

Roof

Windtight and rainproof on the outside

Bonding woodfibre boards

Requirements for secure bonding:

 The substrate must be sustainable, swept clean and free of ice. It must not be adhesive-repellent

Joint, valley, roof ridge

- Prime with Dockskin
- Apply Wigluv in the middle, align

To create extreme adhesion:

- Shake high-performance primer Dockskin
- Apply a covering coat (a)
- Depending on the temperature and substrate wait 5 - 20 minutes until
 Dockskin is transparent and sticky (b)

How it should look:

 Valley, ridge and joint are sealed windtightly with Dockskin and Wigluv 100 or 150

Roof

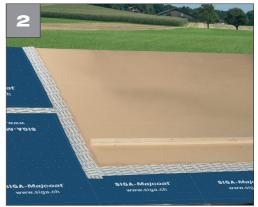

Windtight and rainproof on the outside

Covering membrane

- Prime woodfibre board with Dockskin
- Apply Wigluv in the middle, align
- Remove both backing strips simultaneously, press on

How it should look:

 The transfer area between the covering membrane and the woodfibre board is sealed windtightly with Dockskin and Wigluv 100

Roof

Windtight and rainproof on the outside

Penetration

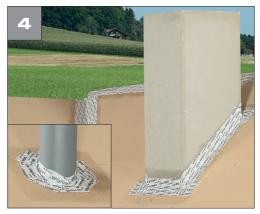

- Prime with Dockskin
- Starting at the bottom and working upwards, cut Wigluv at both ends with approx. 5 cm excess
- Bond half of Wigluv onto the penetration and then half onto the woodfibre board

- Cut into the excess bisecting the angle and fold over
- Do not apply the knife right in the corner!

 Starting at the bottom and working upwards: repeat on each side

How it should look:

 The penetration is sealed windtightly with Dockskin and Wigluv 100

106 Stick with us.

Windtight and rainproof on the outside

Roof

Skylight

- Prime with Dockskin
- Starting at the bottom and working upwards: cut Wigluv to length with approx. 5 cm excess at both ends
- Bond half of Wigluv onto the frame and then half onto the woodfibre board

- Cut into the excess bisecting the angle and fold over
- Cut just short of the corner!

 Starting at the bottom and working upwards:

Repeat on each side

How it should look:

 The skylight is sealed windtightly with Dockskin and Wigluv 150
